

## Mapping Shopify Shipping Option with Fortnox Article ID (SKU)

When a Shopify order containing a Shipping Cost is synced into Fortnox, the synced Fortnox order/invoice will include this shipping cost as a record without any associated Fortnox Article ID (Item Id), check below illustration:

The screenshot illustrates the mapping of a Shopify shipping option to a Fortnox invoice. The top part shows the Shopify checkout page for 'uniwin1' with a cart containing an iPhone 5-S (200.00 kr) and DHL shipping (60.00 kr). The bottom part shows the Fortnox invoice table with two items: iPhone 5-S and DHL. The DHL item has a blank Item ID field, which is highlighted with a yellow oval and a green box. A green arrow points from the DHL shipping option in the Shopify page to the DHL item in the Fortnox invoice table.

ITEM ID	NAME	NUMBER	UNIT	PRICE PER UNIT	DISCOUNT	TOTAL	ACCOUNT	VAT	CC	1
UW170213	iPhone 5-S	1,00		200,00		200,00	3011	0		
	DHL	1,00		60,00		60,00	3011	0		
		2,00								

Invoice text	Shipping	Invoice charge	Invoice discount (%)	Net	Gross	Total excl. VAT
	0,00	0,00	0,00	260,00	260,00	260,00

If you want the Shipping Cost to be associated with a Fortnox Article ID in your Fortnox Order/Invoice, then you can use the “Mapping Shipping Option with SKU” feature to do it. The SKU is NOT the SKU of any product in Shopify, but it is the Fortnox Article ID (Item ID) of an Fortnox Article. Check below illustrations:

ship-dhl	Shipment DHL
ship-fedex	Fedex
