

Unifaun URL tracking

Automatically add the tracking link

This guide will illustrate the steps to add the tracking link automatically inside your Shopify order.

1. Enable tracking

The screenshot shows the Unifaun dashboard interface. At the top, there's a header with 'Unifaun1' on the left and 'by Uniwin' on the right. Below the header is the 'unifaun Transport Administration' logo and 'Unifaun Online Integration by Uniwin'. A navigation bar contains tabs: 'Account Settings', 'General Settings' (selected), 'Printing Favorites', 'Mapping', 'Customs Information', 'Manual Sync', and 'Help'. The main content area is divided into sections. The first section contains several settings with checkboxes: 'Enable Automatic Sync' (checked), 'Sales Channel' (Online Store, Point Of Sale, Others), 'Payment Status' (Paid, Pending, Others), and 'Fulfillment Status' (Not Fulfilled, Fulfilled, Partial, Others). The 'Tracking Method' dropdown is highlighted with a red box and set to 'Unifaun URL - V2'. A red arrow points to this dropdown. Below it, 'Address Sync' has radio buttons for 'Shipping' (selected) and 'Billing'. The second section is titled 'Package' and contains 'Weight Sync' set to 'Total product weight'. A purple 'Save' button is located at the bottom left of the settings area.

Check the above image, go to general settings and set “Unifaun URL - V2” on Tracking Method and click save.

2. Create order

Go to your Shopify store and create an order. Make sure the order is synced to Unifaun dashboard and printed.

3. Fulfill the order

Go to your Shopify order page and fulfill the order.

The screenshot shows the Shopify 'Orders' page. At the top right, there are 'Export' and 'Create order' buttons. Below the page title, there are tabs for 'All', 'Unfulfilled', 'Unpaid', 'Open', and 'Closed'. A search bar labeled 'Filter orders' is present. Below the search bar, there are buttons for 'Filter', 'Columns', 'Sort', and a menu icon. A summary bar shows '1 selected' and a 'Mark as fulfilled' button, which is highlighted with a red box and a red arrow. To the right of this button are 'Capture payments' and 'More actions' buttons. Below this is a table of orders with columns for checkboxes, order IDs, dates, customer names, amounts, fulfillment status, item counts, and shipping methods.

The Unifaun app will now add the tracking link inside your Shopify order.

The screenshot shows the Shopify order details page for order SE1121. At the top, there are navigation buttons for 'Restock', 'Return items', 'Edit', and 'More actions'. Below this, there is a 'Test order' warning box. The main section shows the order is 'Fulfilled (1) SE1121-F2'. Below this, there is a 'Track package' link, which is highlighted with a red box and a red arrow. To the right, there are 'Notes' and 'ADDITIONAL DETAILS' sections. The 'ADDITIONAL DETAILS' section shows 'unifaun_sync: true'.
