

# How to Install the Shopify Shipit App?

## App Installation

### 1. Adding the App to your Shopify store

- Login to your Shopify store
- Go to this link <https://apps.shopify.com/shipit> and click add app as shown in the image below.

## 2. Installing the Shopify Shipit App

Once you've added the App to your Shopify store, the setup wizard will guide you to the Installation page where you need to click on Install app as shown in the image below.

The screenshot shows the Shopify Admin interface for installing the Shipit app. The left sidebar contains navigation options like Home, Orders, Products, Customers, Analytics, Marketing, Discounts, Sales channels, Online Store, and Apps. The main content area is titled 'Install' and features a 'Cancel' button and an 'Install app' button. The app details include the Shipit logo, developer information (prya220812, Fortno2-live), and a list of permissions: 'Access customer and store information' and 'Edit customer and store information'. Below this, there are sections for 'PRIVACY DETAILS' and 'PERMISSION DETAILS', which specify the data the app can access (customer information, store owner information) and the actions it can perform (edit orders). A red arrow points to the 'Install app' button at the bottom right of the page.

### 3. Approve subscription charge and complete the installation

Approve subscription Cancel

! You will not be billed for this test charge.
