Step 1

Click **“General Settings”** and you will see the option **“Enable Automatic Sync”** and **“Enable Automatic Tracking URL Sync”**.

Enable Automatic Sync is used for orders will be synced to Fraktjakt within seconds after the order is placed in Shopify

Enable Automatic Tracking URL Sync is used to immediately fulfill the order then add the tracking link inside your Shopify order and sent the tracking link to customers.

You may select the option you want to enable depends in the set up. By default, only **“Enable Automatic Sync”** is only disabled.

Note: Orders can still sync in **Manual Sync** tab if both of the options are not selected
