# Carrier Service API

Enable Carrier Service API feature in Shopify

Carrier Service API is a feature that allow to display 3rd party delivery option in the Shopify Checkout page. It is also called "Third-party calculated rates" or "carrier-calculated shipping". The feature must be enabled on your store before you install Uniwin's app. If it is activated afterwards, then you must remove and install the app again.
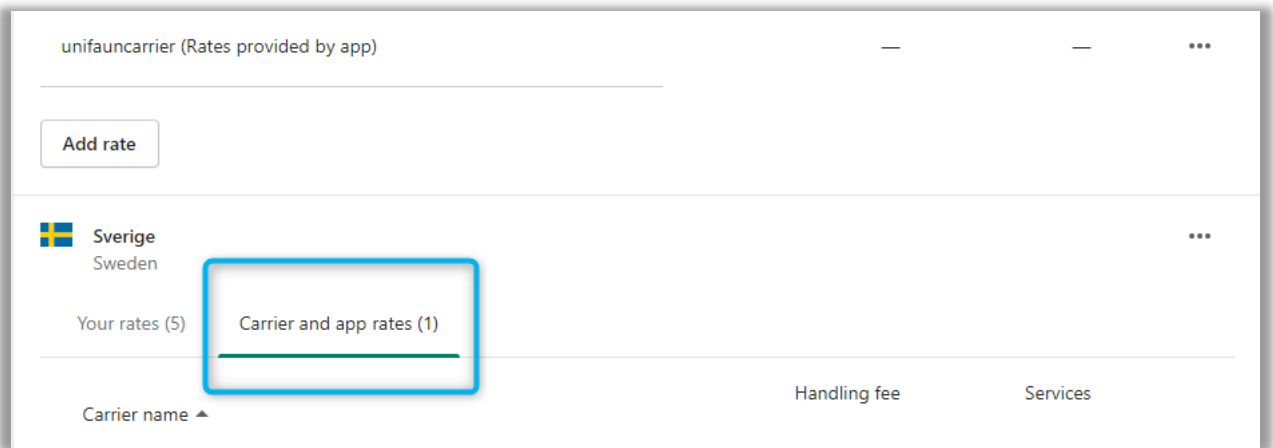

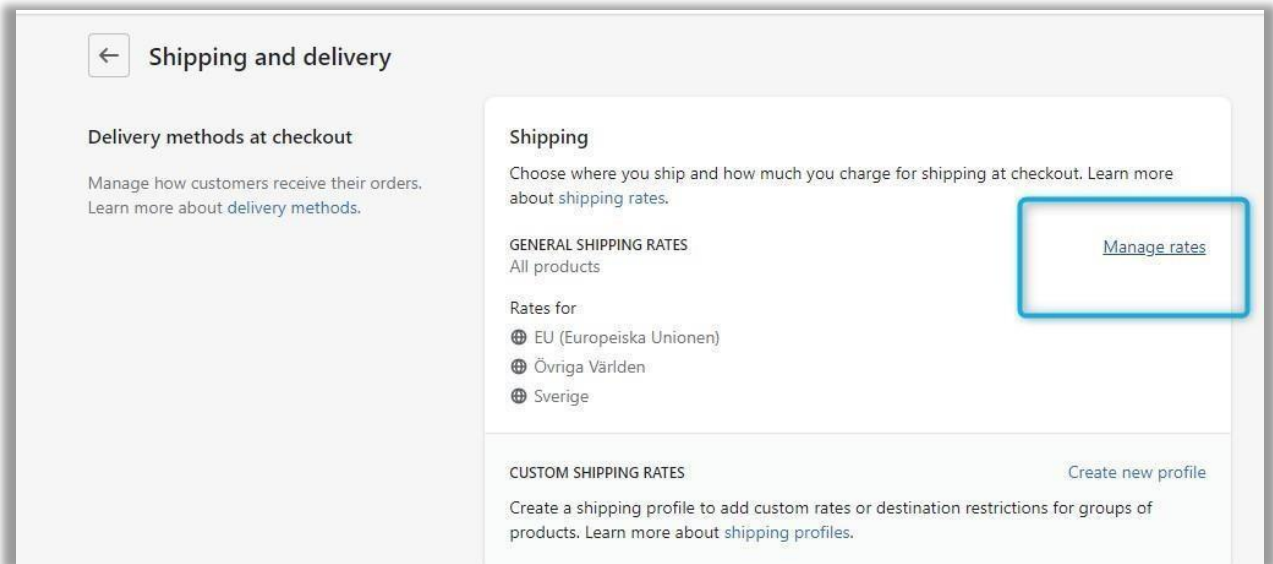

Availability of the Carrier Service API feature depends on the Shopify plan you are on. Shopify Advanced and Shopify Plus plan are included with Carrier Service API. Stores on Shopify plans can contact Shopify support for this feature: https://help.shopify.com/en/ Stores on Starter or Basic plan Carrier Service API not available.

Shopify Plan	Availability of the Carrier Service API
Shopify Basic (Monthly)	Not Available
Shopify Basic (Yearly)	Not Available
Shopify Standard (Monthly)	$20 per Month (Contact Shopify support to enable this)
Shopify Standard (Yearly)	Free (Contact Shopify support to enable this)
Shopify Advanced (Monthly)	Default
Shopify Advanced (Yearly)	Default
Shopify Plus (Monthly)	Default
Shopify Plus (Yearly)	Default

In Shopify admin you can verify whether Carrier Service API is enabled or not. Go to page Shopify Dashboard -> Settings -> Shipping and Delivery. On section "Carrier accounts" / "Enable third-party calculated rates at checkout" you can see "Upgrade you plan" if the service is not enabled for you.

When the feature is activated and registered for use by any app, then you will be able to see the section "Carrier and app rates" in Shopify Admin if you go to Settings->Shipping and Delivery->Manage Rates, see images below.
