

Connect your Online Store to Postnord

Source : <https://portal.postnord.com/se/en/resources/guides/skicka-direkt-business/e-commerce-skicka-direkt-business/>

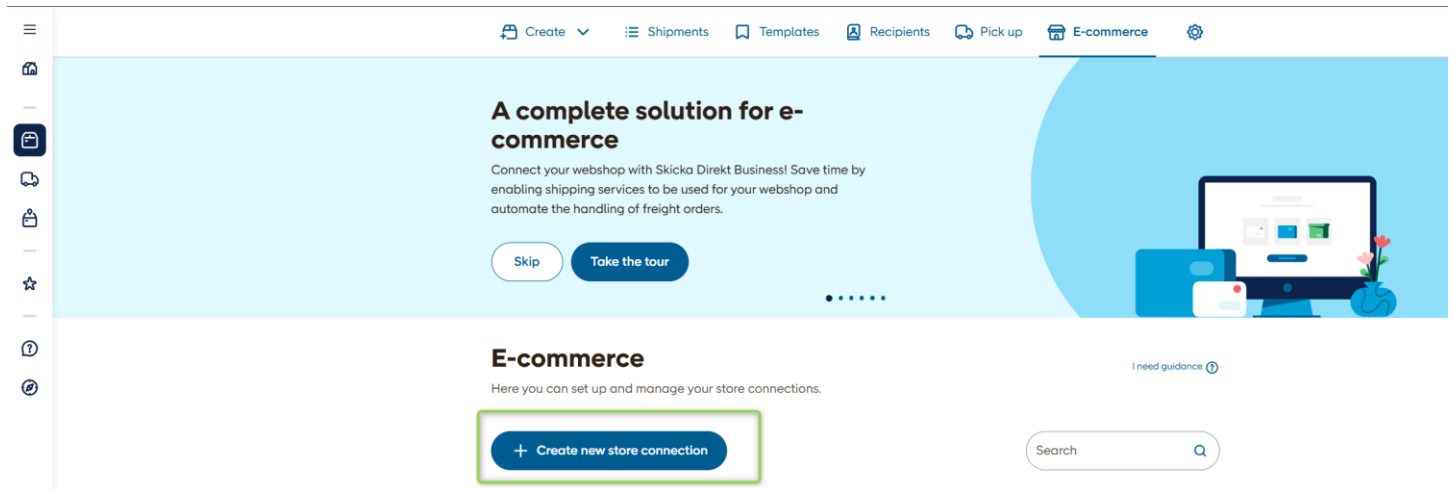

Store connections are handled in "eCommerce" inside Skicka Direkt Business

By default, you need to be a company Admin to see this tab. Ask your company admin for access if you need it.

Create a store connection to get started

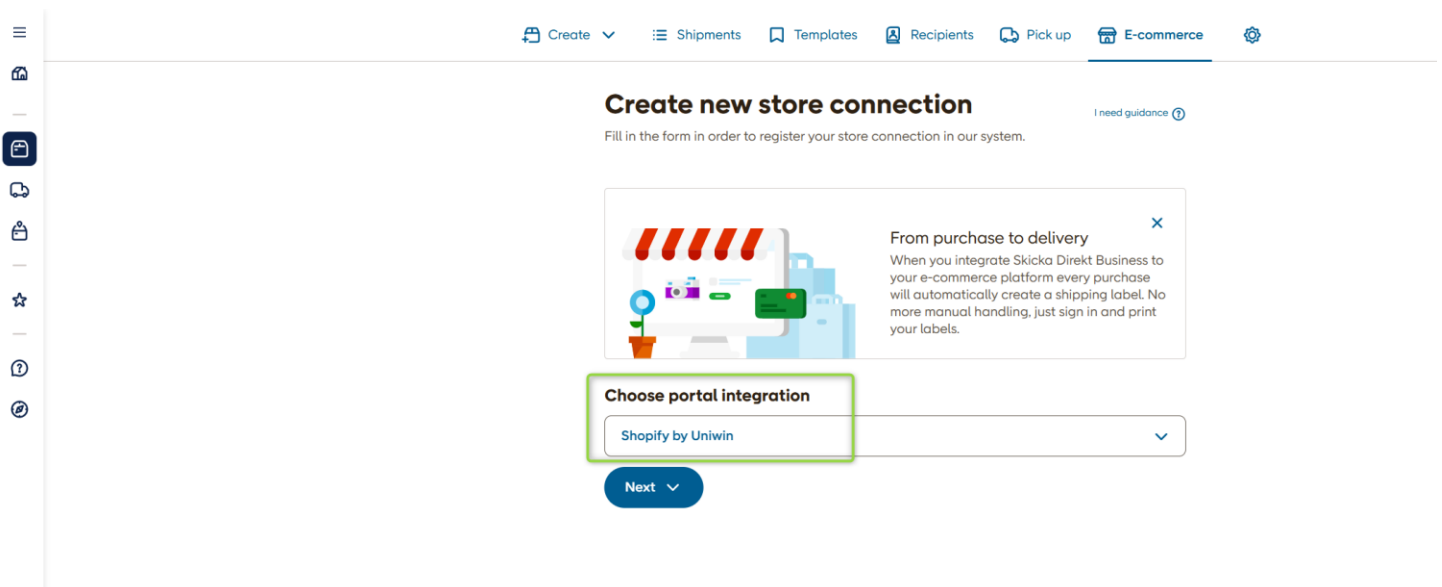

If you have more than one online store, you'll most likely have separate eCommerce instances set up for them. Create a new store connection, and we'll set up a connection point to one of your stores.

The screenshot shows the Uniwin E-commerce dashboard. At the top, there is a navigation bar with icons for 'Create', 'Shipments', 'Templates', 'Recipients', 'Pick up', and 'E-commerce'. The main content area features a large blue banner with the heading 'A complete solution for e-commerce'. Below the banner, there is a section titled 'E-commerce' with the subtext 'Here you can set up and manage your store connections.' A prominent blue button labeled '+ Create new store connection' is highlighted with a green border. To the right of this button is a search bar with the text 'Search' and a magnifying glass icon. A 'Skip' button and a 'Take the tour' button are also visible in the banner area.

Choose portal integration

Choose Portal Integration as “Shopify by Uniwin”

The screenshot shows the 'Create new store connection' form. The title is 'Create new store connection' with a subtext 'Fill in the form in order to register your store connection in our system.' Below the title, there is a blue button labeled '+ Create new store connection'. A dropdown menu titled 'Choose portal integration' is open, showing 'Shopify by Uniwin' as the selected option. Below the dropdown is a blue button labeled 'Next'. A callout box titled 'From purchase to delivery' provides information: 'When you integrate Skicka Direkt Business to your e-commerce platform every purchase will automatically create a shipping label. No more manual handling, just sign in and print your labels.'

Add your sender information

Add your store name and choose sender

From purchase to delivery
When you integrate Skicka Direkt Business to your e-commerce platform every purchase will automatically create a shipping label. No more manual handling, just sign in and print your labels.

Choose portal integration
Shopify by Uniwin

Setup store
Copy shipping service configuration from another store connection (optional)
I don't want to copy from another store connection

Store name
Nemi

Sender
Specify the address that you want written as sender on shipments connected to your store.

Stockholm Clothes AB 20809342	Drakninggatan 7 11143 Stockholm	postnord@uniwin.se	Choose
c/o Advokaterna Hurtig & Partners 20809342	Lilla Brogatan 7 503 30 Borås	+46102635000 postnord@uniwin.se	Choose

Set up and manage your sender addresses in your settings.

Confirm

Save your Key and ID and enter it into your Postnord app

Now you have the secret identifiers you'll need to enter into your Postnord app to complete the connection. These only get shown to you once, so save them.

The screenshot shows the Uniwin E-commerce portal interface. At the top, there is a navigation bar with icons for 'Create', 'Shipments', 'Templates', 'Recipients', 'Pick up', and 'E-commerce'. The main content area features a heading 'Your store connection is almost done!' with a 'need guidance' link. Below this, it states 'Below is your authentication information to be used in your portal integration.' and lists the 'Identifier' (ECSXHTVUBZER2D3YXRW) and 'Key' (31fb9cd5cdb845488fd7ec25caa4e30d). A light blue callout box contains a warning: 'It is very important that you save the information above, since it is not shown again, write it down or make a screenshot!'. Under the heading 'What happens next?', it explains that once the store is connected, shipping services can be configured. A checkbox is checked with the text 'I understand that I have to save this information'. A blue 'Done!' button is located at the bottom of the section.

Set up your shipping options

These determine which shipping options your customer has in your checkout. You'll set prices, and logic that decides when an option is or is not shown for the customer (such as by weight or by cart value). You can also set an option for the customer to collect their order in one of your physical stores.

Finally, name your shipping option for your own usage, so you can find and reconfigure it later.

Nemi

I need guidance ⓘ

Choose which shipping services you want to be able to book and optionally offer to your customers in your e-commerce checkout. For checkout, you can set rules for the different shipping services: as price depending on weight and recipient country, limit for free shipping etc. and which additional services should be included.

Print labels for your shipments

As customers make purchases and choose your shipping options, shipping orders will appear inside your store connection page. Here you can also view the order details, add the final weight of the shipment where needed, and print the label for the shipment. You can also remove orders you don't need.

The screenshot shows the Uniwin 'Shipments' management interface. At the top, there are navigation tabs: 'Create', 'Shipments', 'Templates', 'Recipients', 'Pick up', and 'E-commerce'. The main heading is 'Shipments'. Below the heading is a search bar and two filter buttons: 'Unconfirmed' and 'Confirmed'. A 'Print selected' button is highlighted with a green arrow. Below the filters, there are buttons for 'Selected (2/34)', 'Last 3 days', and 'Showing 1-34 of 34'. The main content area displays two shipment entries:

Date	Order ID	Tracking ID	Service	Recipient Address	Status
