

# Carrier Service API

---

## Carrier Service API – Shopify

This document explains how to enable the Carrier Service API feature in Shopify to display third-party delivery options at checkout.

### What is Carrier Service API?

Carrier Service API allows third-party delivery options to be displayed on the Shopify checkout page. It is also called “Third-party calculated rates” or “Carrier-calculated shipping”. This feature must be enabled before installing Uniwin’s app. If activated after installation, you must uninstall and reinstall the app.

### Availability of Carrier Service API by Shopify Plan

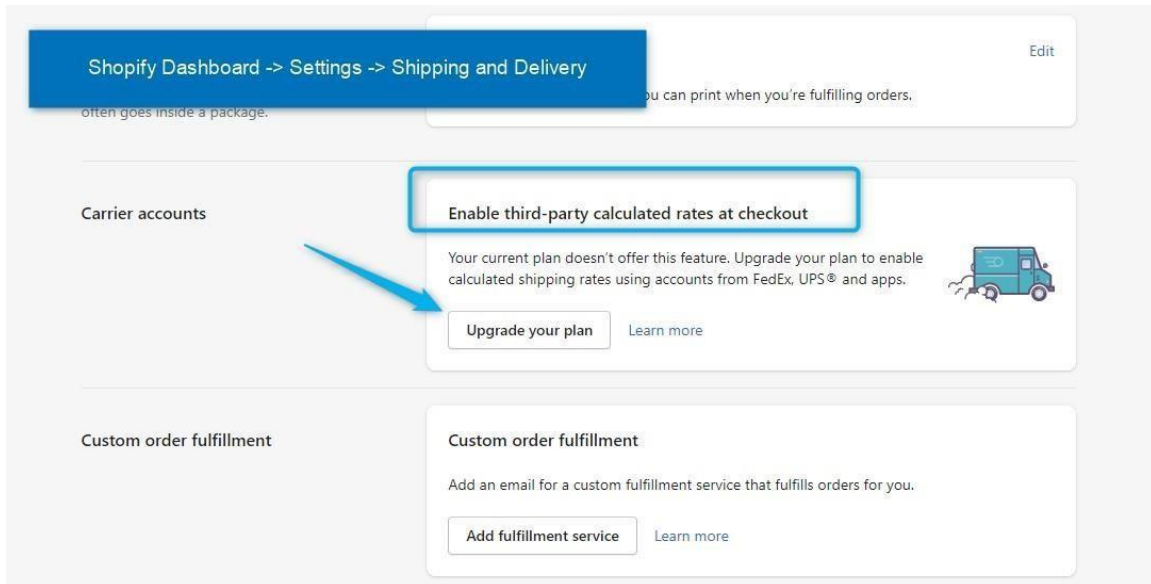

Availability of the Carrier Service API feature depends on the Shopify plan you are on.

- i). Shopify Advanced and Shopify Plus plans include the Carrier Service API by default.
- ii). Stores on Shopify Grow plan can contact Shopify Support to enable this feature: <https://help.shopify.com/en/>
- iii). Stores on Starter or Basic plans do not have access to the Carrier Service API.

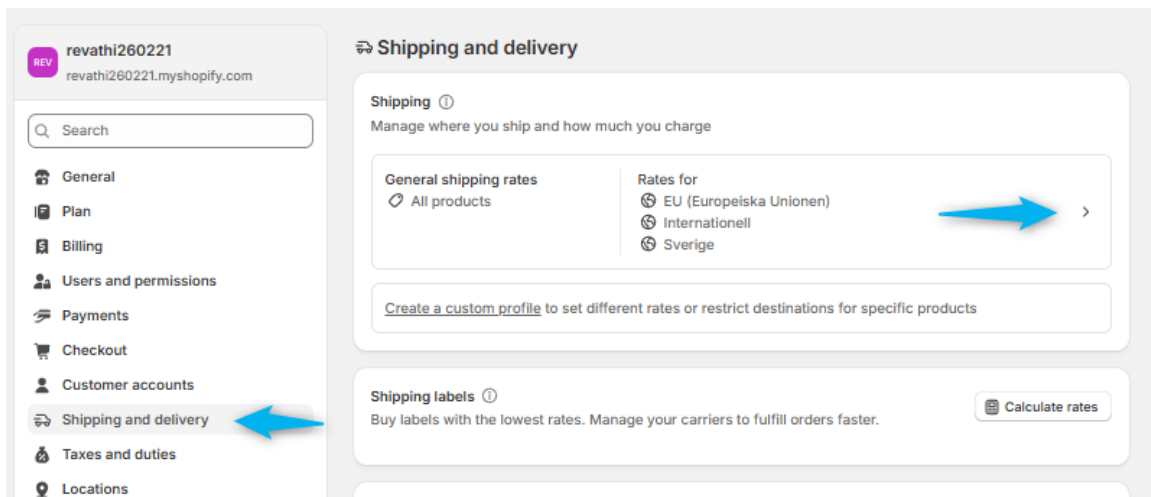

Plan Name	Billing Cycle	API Availability	Additional Notes
Shopify Basic	Monthly	Not Available	—
Shopify Basic	Yearly	Not Available	—
Shopify Grow	Monthly	\$20 per month	Contact Shopify support to enable
Shopify Grow	Yearly	Free	Contact Shopify support to enable
Shopify Advanced	Monthly	Included by default	—
Shopify Advanced	Yearly	Included by default	—
Shopify Plus	Monthly	Included by default	—
Shopify Plus	Yearly	Included by default	—

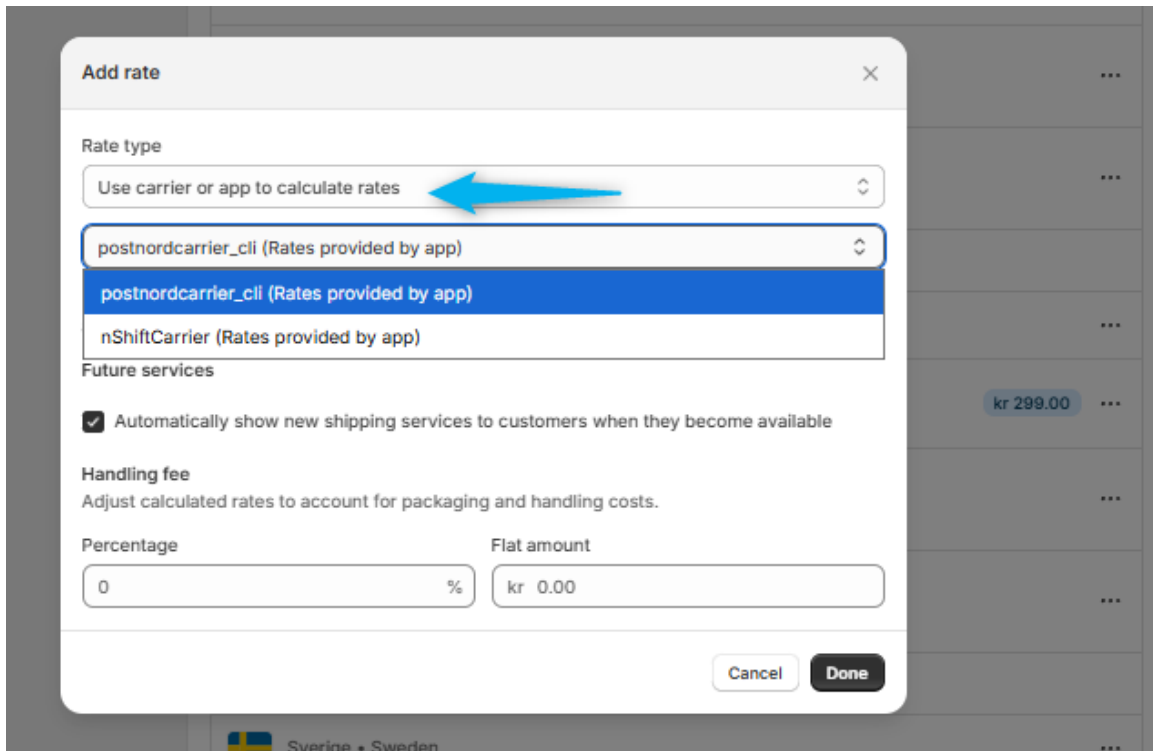

## How to Verify if Carrier Service API is Enabled

1. Go to Shopify Admin Dashboard.
2. Navigate to Settings → Shipping and Delivery.
3. Check the section “Carrier accounts” or “Enable third-party calculated rates at checkout”
4. If you see “Upgrade your plan” the feature is not enabled.

When the feature is activated and registered by an app, you will see the section “Carrier and app rates” under: Settings → Shipping and Delivery → Manage Rates.
